

1) Description of orientation

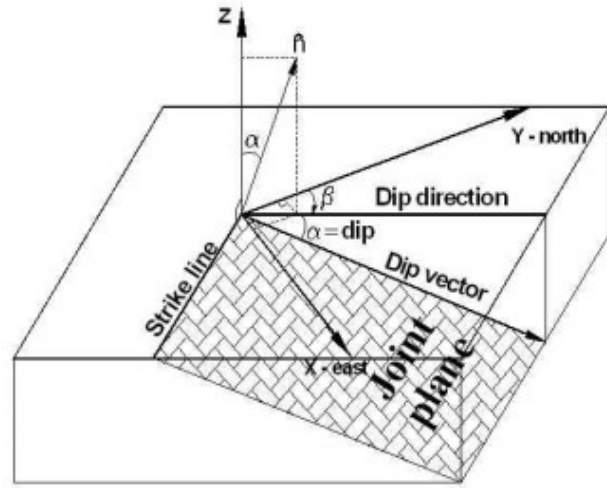

Fig. Dip direction, dip, strike and normal vector of a joint plane.

- Normal vector of a plane

3D Cartesian coordinates of normal vector of a joint whose dip direction (β) and dip (α) are given (when +Z axis points vertical up).

$$N_x = \sin a \sin b$$

$$N_y = \sin a \cos b$$

$$N_z = \cos a$$
